

Online Zero bone loss concepts©

Surgical part

1. Zero bone loss concepts© - harmony of biology and implant design factors.
2. How to place implants according to Zero bone loss concepts© philosophy?
3. Methods to increase vertical soft tissue thickness. Subcrestal implant placement
4. Flattening of the bone and tent-pole technique
5. Vertical soft tissue augmentation with various soft tissues grafts

Prosthetic part

1. How to make safe cemented restorations?
2. Screw-retained Ti-base supported solutions. Single, angulated, FPDs and full-arch.
3. Important aspects of retentive and gingival parts of Ti-bases.
4. Subgingival materials – zirconia, lithium disilicate, porcelain or other?
5. Supragingival materials for implant restorations

Hands-ons

1. Surgical hands-ons. Vertical soft tissue thickening methods
2. Prosthetic hands-ons. Use of bite registration material to increase impression transfer stability
